

## **Extended Warranties for FacetPhone Equipment**

FacetPhone equipment is warrantied for one year from the date it is put into service as described in the "FacetPhone Limited Software License and Limited Warranty Agreement (End User)".

You may purchase an extended warranty for all or selected FacetPhone equipment either at the time of purchase or before the one year standard warranty has expired. You may renew an extended warranty before the end of each warranty period until the item has completed its seventh year of service. After the standard or any extended warranty has lapsed for an item, no further extended warranty will be offered for the item.

If any FacetPhone equipment fails while under standard or extended warranty, FacetCorp will replace it free of charge subject to the exclusions in the "FacetPhone Limited Software License and Limited Warranty Agreement (End User)". If the same make and model of equipment is no longer available, it will be replaced with functionally equivalent equipment.

FacetCorp will pay for ground shipment of replacement equipment to the customer. If the customer desires expedited shipping, they will pay the difference in shipping charges. At FacetCorp's request, the customer will pay for ground shipment of the broken equipment to FacetCorp.
